(https://www.australiannationalreview.com/resources/graphene-oxide-detox-protocols-for-the-vaxxed-unvaxxed/)

Graphene Oxide Detox Protocols for the Vaxxed & Unvaxxed

By Daily News Break

There are many people now experiencing jabbers remorse and want to know what they can do to detoxify ***Graphene Oxide Nanoparticles*** and the gain-of-function spike protein they were

injected with. Meanwhile, the unvaxxed are experiencing Adverse Events and magnetism due to transmission.

This article contains all the known safe and effective detox protocols that both the vaxxed and the unvaxxed can use to help your body remove these deadly poisons.

DR. ZELENKO'S PROTOCOL

Dr. Vladimir (Zev) Zelenko is a Board Certified Family Physician. He was the first in America (March 2020) to innovate a successful treatment for covid-19.

A Nobel Prize nominee, Dr. Zelenko was ***censored and de-platformed*** across big tech for sharing his life-saving formula and for affirming that Covid-19 is a "bioweapon for mass Genocide".

Dr. Zelenko's Protocol contains Ivermectin, Hydroxychloroquine (HCQ), Zinc, Vitamin D3, and Quercetin. See Dr. Zelenko's Protocol. Read more about Dr. Zelenko's Protocol and watch his latest very important interview.

America's Frontline Doctors are helping people obtain Ivermectin.

Hospitals can purchase Ivermectin for critical care.

Scientific studies:

Over 100 studies proving that Vitamin D3 is essential for treating Covid-19 can be viewed.
A Slovakia research team discovered under microscopy that Ivermectin halts the crystalline growth of Graphene Oxide Hydrogels inside your body.

VITAMIN C

his study demonstrates that Ascorbic Acid (Vitamin C) is very effective at reducing Graphene Oxide Toxicity from the body. And this study shows that high dose Vitamin C is also an effective treatment for Covid-19, even for the critically ill. Finally, intravenous Vitamin C can be successfully used to treat patients with Covid-19.

Important note:

If you take more than 10,000 international units of Vitamin D3 per day, you must stop consuming all dairy and Vitamin C supplements in order to avoid calcium clots.

N-ACETYLCLSTEINE (NAC)

The research of La Quinta Columna led by Ricardo Delgado, successfully tested an *inexpensive* way to remove magnetic Graphene Oxide Nanoparticles from the human body after they were injected with a Covid jab using N-acetyl-cysteine (NAC) and Zinc.

“These two antioxidants are essential to degrade Graphene Oxide,” says Delgardo. NAC causes your body to secrete glutathione endogenously and glutathione can reduce Graphene Oxide Toxicity down to zero. In this article and video, you will see Delgado describe what to do.

Scientific studies:

A study published in PubMed reveals that biocompatible NAC reduces Graphene Oxide. In an animal study where enhanced spike protein was used to cause lung damage to animals by binding to the ACE2 receptors, the animals were remedied using NAC.

Instructions:

La Quinta Columna recommends taking NAC 600-750mg, first thing in the morning on an empty stomach. Also take 2x tablets of Zinc, 25mg each.

Secondary: Astaxanthin 5mg, Querectin, milk thistle, Vitamin D3.

DR. RIMA’S PROTOCOL

Dr. Rima Laibow recommends taking 900mg of NAC per day. Some people are even taking 1400mg. Since NAC is an amino acid, it’s safe to consume it in a non-pharmaceutical, natural

form. If using a synthetic pharmaceutical NAC, please consult a physician on dosage.

In addition to NAC, Dr. Rima also uses the following protocol.

In addition, I personally take 10,000 IU of Vitamin D3 (Vital Nutrients)and add 400 mg of Co-Q 10 (Bioclinic Naturals), 10 mg of Biotin (Now), B-Complex (Vital Nutrients), 1000 mg of L-Glutamine (Protocol for Life Balance),, 60 mg Hyaluronic Acid ((Now), 1 tablespoon of high DHEA Fish Oil (Nordic Naturals) and 1000 IU of Vitamin E and mixed tocotrienols and tocopherols (Carlson E Gems 1000).

While NAC is effective at enabling your cells to produce glutathione, it has some limitations. For example, it's more effective when *injected* vs ingested orally. Also, its effectiveness starts decreasing after about 3 months so a long-term solution must be used.

ASEA REDOX SIGNALING MOLECULES

It has been **demonstrated** that Graphene Oxide Toxicity causes intracellular oxidative stress, leading to cytotoxicity and the inhibition of cell proliferation. **Glutathione** is one of the main body antioxidants that eradicates free radicals and poisons from your body. Glutathione is a cell-signaling molecule *created by our cells* and used by our bodies at the *speed of light*. Glutathione is vital in the regulation of oxidative stress levels to maintain normal cellular function. However, its concentration decreases with age, and people are already deficient in glutathione.

ASEA Redox signaling molecules is called the *'Water of Life'* because it reactivates gene signalling pathways which get shut off by Graphene Oxide Toxicity. ASEA Redox enables your cells to increase the endogenous glutathione production by a whopping 500-800%, thus detoxifying Graphene Oxide Nanoparticles and spike protein, *optimally*.

According to scientific research, ASEA Redox signaling molecules increase the capacity of cells to detox by 4 fold and may increase mitochondria production by 30% after a fortnight. This meta anti-oxidant has the potency of an antidote and because it's native to the body, the benefits of consuming ASEA will increase with continued use. These anti-aging cell signaling molecules are also good for teeth and gums.

ASEA was originally discovered and developed by a Biotech firm. An atomic medical physicist *specialized in nanotechnology* and a **Nobel Prize winner** figured out how to stabilize the molecules for human consumption. There are years of research and a plethora of doctors behind ASEA. While the pharmaceutical industry attempted to suppress this medical breakthrough, ASEA's founders had an integral mission to make their product widely available for public use.

ASEA has the power to potentially save the lives of the vaxxed and will detox transmission in the unvaxxed. It's potentially the strongest single treatment that's mentioned in this article.

Scientific research:

This initial gene study showed ASEA Redox affected important signaling pathway genes.

SURAMIN

It's worth mentioning that whistleblower Dr. Judy Mikovitz went on record stating that Suramin is the 'antidote' to the Covid-19 bioweapons. Suramin is a pharmaceutical drug that is derived from pine needles. Dr. Mikovitz states that a small amount of Suramin injected into the body is sufficient. Consult a doctor before using.

PINE NEEDLE TEA

Pine needles, Spruce, Cedar and Fir (conifers), contain **Shikimate** (Shikimic Acid), and a slew of other meta nutrients which boost immunity, hydrate, and contribute to the detoxification of Graphene Oxide Nanoparticles at a cellular level.

Conifer needle teas inhibit adverse reactions from graphene oxide and Covid-19 spike protein transmission and protect against components of the **coagulation cascade**; possibly protecting against blood clots. Pine tea also inhibits the inappropriate replication and modification of RNA and DNA.

Conifer needle oil and needle tea rejuvenates cells and act as a natural stress reliever, pain killer, and antibiotic. It treats every kind of pain, stress, trauma, and PTSD because it works directly on the nerves, bypassing your nervous system. It's one of the few meta nutrients which erases cellular memory of trauma. Essentially, everyone should be drinking pine needle tea or taking pine oil.

SHIKIMATE

Shikimate has been used in traditional Chinese medicine to *halt plagues, and pandemics*. Shikimate halts respiratory infections and viral replication. It can be found in high doses in pine needle tea. It's also found in a large quantity in Star Anise, Fennel, and dandelion root, leaf and flower.

World renown Scientist Mike Adams the Health Ranger and founder of Natural News, explains how you can easily extract Shikimate from these herbs using an espresso machine..Like other experts, the Health Ranger expresses his belief that the vaxxed may still be able to save themselves.

DAVID WOLF'S PROTOCOL

It's very important to consume as many foods, herbs, spices, and natural medicines as you can which contain Shikimate. David Avocado Wolf is a world-renown health guru. Please

follow **David Avocado Wolf's Protocol** and learn how to order the world's finest natural products in "Summary of the Spike Protein Protocol".

Important note:

Please only consume natural forms of C60 offered by David Avocado Wolf. C60 in its pharmaceutical form must be avoided due to overtly toxic properties. Similarly, iodine found in bleached table salt is a poison and must be avoided. Your body simply will not assimilate it.
Natural forms of iodine can be assimilated and absorbed by your body, like the iodine found in vegetables and herbs.

HYDRATION

Done Assignment Hydration.docx 

Assignment 1 – Hydration

Making Health Happen

<u>Every-Day Hydration</u>

1. Fill 2 1-liter bottles with fresh water (empty ASEA bottles are ideal)
2. Add a pinch of sea salt or Himalayan salt to each bottle (to add electrolytes).
3. Squeeze a few drops of fresh lemon juice into each bottle.
4. Drink half a bottle before breakfast.
5. During the day, drink water from these bottles.
6. At the end of the day, note how much water you drank

During this assignment, only drink water till satisfied. Don't worry if you don't drink all 2 bottles a day. The bottles are helpful to measure how much water you have taken per day. For comments or questions, our email is:

Hydration is *key* to your health, to detoxification, and to using these protocols: *all of them*. If your body is dehydrated it cannot properly absorb the nutrition particles from what you consume and that nutrition will be flushed out and lost.

Right now, 97% of the world's population is *dehydrated* and 76% is *chronically* dehydrated. This is due to the majority of our drinking water is acidic based and the molecules are simply too big to be absorbed by our cells.

Dehydration hinders cell communication. Drinking 8 glasses of water per day will not hydrate you unless it contains electrolytes.

It's extremely important to keep your body's PH level in balance. You want to be always in an *alkaline* state. An Acidic body is a breeding ground for disease. Electrolytes will not only keep you hydrated but will also balance PH.

Pine needle tea is a natural electrolyte and very hydrating. Sea salt is also a natural electrolyte. Normal sea salt has between 16-24 minerals but Himalayan salt has *87 minerals* which is the exact same saline as your blood. So toss out your table salt and replace it with Himalayan salt.

Hydration formula:

Add about a quarter of a teaspoon of Himalayan salt to one liter of water. Squeeze a quarter of fresh lime or lemon juice (lime is less astringent and just as good) into your glass of Himalayan charged water each time you drink. This is a complete electrolyte formula that will fully hydrate you.

ANTIOXIDANTS AND ROOIBOS TEA

Consume foods, herbs, and medicines that are high in antioxidants which enable your body to detoxify poisons. African bush tea called **Rooibos** is a *meta* antioxidant and is widely available in supermarkets, worldwide.

Asians are believed to have the lowest cancer rates because of their daily consumption of green tea. Drinking one cup of Rooibos tea is equivalent to consuming 50 cups of green tea in its antioxidant effect. Rooibos is also very hydrating.

ADDITIONAL INFORMATION

Dr. Zelenko explains that “the Covid-19 poison death shots create killer antibodies and killer antibodies are time bombs that get triggered by exposure to matching viral infections”. NANA-ME may stop that from happening. N-Acetyl Neuraminic Acid Methyl Ester (NANA-ME).

Dr. Zelenko further says that “NANE-ME may prevent Antibody-Dependent Enhancement (ADE) and potentially billions of deaths”. Please see the study for treating adverse reactions caused by pathological antibodies induced by Covid-19 and vaccines.

Investigative Journalist Ramola D. has additional recommendations for detoxifying Graphene Oxide (GO) Nanoparticles after exposure from chemtrails.

Dr. Carrie Madej suggests regular detox baths with **Bentonite Clay** to help your body remove GO Nanoparticles.
BATH: MAKE THE WATER AS HOT AS YOU CAN STAND FOR 20MINS: INGREDIENTS
2cups baking soda
2cups of Epsom salt
1cup of borax (laundry detergent)
1cup of Bentonite Clay
MIX WELL AND SOAK FOR 20 MINUTES, THEN RINSE OFF AND CLEAN THE BATHTUB, WHICH IT WILL HAVE RESIDUE OF TOXINS FROM YOUR BODY.

CBD oil and Cannabis will help your body cleanse GO Nanoparticles.

Chlorine Oxide can also detox GO.

Sodium bicarbonate E500 (baking soda) will help to keep your PH level in an alkaline balance.

Super Blue Green Algae is a miraculous meta nutrient which chelates the blood and removes heavy metals.

Saladmaster cookware enables you to retain up to 98% of nutrition when cooking your food.
Saladmaster pans are made from titanium and surgical stainless steel and do not leach any metals into your food.

To minimize transmission, I suggest showering after being around the general population. Either wash your clothes immediately or keep them in a plastic bag until you wash them.
